

1 Collection Design

Each Collection is composed of a number of pre-designed furniture models and cabinetry models offered in

- Door-Drawer Style(s)
- Wood
- Color choices for that particular Collection.

Each Collection has its own unique combination of standard features, such as construction, door-drawer edge profile, molding, crown style, light fittings finish, light globe, hardware and mirror style which makes it distinctive from other Collections.

In addition, a number of Personal Design Options are available for particular models within that Collection.

Collections are grouped into the quality level Cabinet Series of

- Premier
- Royale
- Classic

Woodpro Collections can also be grouped by Construction Type. Woodpro Premier, Royale and Classic cabinet collections are constructed in the Overlay style or Molding Overlay style.

Overlay Construction

The word Overlay describes the way the doors and drawers cover, or overlay, most of the cabinet frame.

Molding Overlay Construction

Molding Overlay means that the cabinet has side moldings (like flutes, split columns, rope or plain). Cabinets with crown molding have top molding (like dentil or plain) underneath the crown. When side and top molding (or a vanity top) surrounds the doors and drawers (or mirrors) on three sides, it gives our molding overlay cabinetry some of the look of cabinetry with inset doors and drawers.

Table Leg Construction

Premier Series cabinetry with Table Leg Construction has the same general cabinet construction and dimensions as Premier Molding Overlay Construction, but, have solid wood 2 3/8" square legs on both the front and back. Vanity models are available with and without open shelves below.

Door-Drawer Styles & Wood Choices to Fit Your Style 1

The Zenith door style above is an example of a 1-Piece (or slab) door and drawer front. Shown in the Lambiere Collection.

The Prestige door-drawer style above is an example of a 5-Piece door and drawer front. Shown in the Estate Collection.

Door-Drawer Styles

The door-drawer styles on a cabinet can transform a cabinet's look. Most cabinet collections offer multiple choices of door styles. Drawer and false drawer fronts can be a 1-piece wood slab or a 5-piece assembly.

Doors and drawer fronts are 1-piece (or slab) if the front of the drawer or door looks like a single slab of wood – like the Zenith door style on left. For slab doors and drawers, the grain of the wood runs side-to-side for drawers and up-and-down for doors.

"Five-piece" means that the door was crafted from five separate pieces of wood – four pieces of wood form a frame around a wood panel (or High Density Fiberboard panel if painted maple.) In collections with 5-piece drawer fronts, the drawer will match the door style you select.

The door-drawer style choice can allow a Woodpro Cabinet Collection to fit into more than one design category. The door-drawer styles below are available. *Some styles are not available in all collections.*

Door-Drawer Profiles

See Collection pages 1.6-1.16 for specific collection profile.

E Eased edge door and drawer front edge profile

O 3/8" Ogee door & drawer front edge profile

New! Yorkshire and Zephyr Collections have wide door stiles and rails. The following Door Styles used in these Collections are like the style they are named after except they have wide door frames: Shaker 2 (K), Wilton 2 (I), Edgewood 2 (V) and Ultra 2 (Y). For Yorkshire, that has 5-piece drawer fronts, the drawer front rails on the top drawer and false drawer fronts are standard rather than wide.
